PROFILE

Detail-oriented Computer Science student and passionate **Software Developer** with hands-on experience in building, testing, and deploying web applications from idea to launch. Excels at translating Figma designs into functional, responsive, and scalable software. Thrives in collaborative, remote environments and possesses a strong eye for UI/UX details. Eager to apply technical skills and creative problem-solving to build high-impact, global products.

Experienced in building complex apps, integrating APIs, webhooks, and optimizing performance in Bubble. Passionate about fast execution, detail-oriented UI, and creating high-impact user-focused platforms. Ready to contribute in fast-moving, product-driven environments.

EDUCATION

Islington College, Kathmandu (Affiliated with London Metropolitan University, UK)

BSc (Hons) Computing | 2023 – 2025

Coursework includes: Software Engineering, Database Systems, Web Development, and Cloud Computing.

EXPETIENCE

Software Developer | Zappify Tech Solutions| Nov 2025 – Present | Remote

- Develop and optimize scalable web applications using Bubble.io, focusing on performance, usability, and clean architecture.
- Design and manage workflows, APIs, and database structures for SaaS and MVP products.
- Translate Figma designs into responsive, production-ready interfaces with strong attention to UI/UX.
- Collaborate in a remote, fast-paced environment to deliver high-quality features and improvements.
- Take ownership of end-to-end feature development, from requirements to deployment, ensuring reliable and scalable solutions.

Live App Works

- **AIC GGSIPU** – Built dynamic landing pages and developed an internal admin dashboard
<https://aic-ggsipu.org/>
- **Doodlspace** – Redesigned system architecture; migrated from role-based to profile-based access for improved scalability
<https://app.doodlspace.com/>
- **Ciree** – Revamped dashboard UI and restructured application logic for better performance and scalability
<https://ciree.in/>

In Testing (Not Deployed Yet)

- **Scholarsmate App** – Multi-role learning platform (Admin, Student, Parent)
 - Implemented MCQ system with timer, AI explanations, accuracy tracking, and gamification (coins system)
 - Built admin dashboard with student management, analytics, bulk question upload, and roadmap control
 - Designed performance reports, onboarding-based content delivery, and topic-wise progress tracking
 - Ensured role-based access control, validations, and secure workflows across the platform

Full Stack Senior Bubble Developer | Zstudioo | Dec 2023 – Nov 2025 | Remote

- Built and launched powerful web applications from the ground up using the **Bubble.io** platform, taking real ownership of product logic and functionality.
- Translated Figma prototypes into fully responsive, production-quality interfaces.
- Designed scalable database structures, custom states, reusable components, and workflow logic.
- Collaborated closely with UI/UX designers to convert Figma prototypes into fully responsive and interactive applications, Developed reusable components, managed custom states, and built complex backend workflows to optimize application performance.

- Integrated third-party tools and external APIs (REST, JSON) to extend application functionality. Conducted thorough testing, debugging, and troubleshooting to ensure application quality, reliability, and scalability.

Key Applications Delivered in (Bubble.io): Played a lead development role in creating and launching:

Photify (<https://photify.co/>) **Live App:** A photo-centric application.

ClockItUp (<https://app.clockitup.io/>) **Live App:** A productivity and time-tracking platform.

Sleep AI — Bedtime Story Partner (Mobile App) : AI bedtime companion that narrates personalized sleep stories for kids & adults. Features: custom AI flows, text-to-speech, character voices, playlists, storytelling engine.

Marketplace Works: (**3+ Internal Projects**).

ACADEMIC PROJECT

Rentify (Final Year Project): Property rental platform built with React.js & Django backend, deployed on Vercel. rentiify-live.vercel.app

Student Dashboard: Built a responsive academic dashboard for managing learning modules and assignments.

E-Commerce System: Designed and developed with **Java (JSP, Servlets)** and **MySQL database**.

TECHNIC SKILLS

Bubble.io: Workflows, Conditionals, Data Types, Reusable Components, Responsive Design, API Integration, Plugin Configuration, Database Optimization.

Programming Languages: Python(Django), JS([React.js](https://reactjs.org/))

Deployment: Vercel, koyeb, GitHub, Cloud Hosting.

API & Integrations: Stripe, Parcel2Go, SendGrid, Webhooks (real-time updates).

Web Fundamentals: HTML, CSS, JavaScript.

Tools: GitHub, Figma, REST APIs, JSON.

SOFT SKILLS

Problem-Solving • Communication • Team Collaboration • Time Management • Remote Work Adaptability
